## **DETAILED ACTION**

### ***Election/Restrictions***

1. This application contains claims 1, 2, 8-13 and 19-30 drawn to an invention nonelected with traverse in the reply filed on 05/07/2010. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

### ***Claim Rejections - 35 USC § 101***

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

**Claim 52** is rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. **Claim 52 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.**

5. **Claim 52** provides for the use of the exposure apparatus of claim 16, where the claim recites “A device production method including a lithography process, wherein a pattern is transferred onto a photosensitive element in the lithography process using the exposure apparatus as recited in claim 16”, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced. *See MPEP*  2173.05(q).

***Allowable Subject Matter***

6. **Claims 5-7, 16-18 and 31-51** are allowed.

Art Unit: 2882

7. The following is a statement of reasons for the indication of allowable subject matter:

**With respect to claims 5 and 16**, the prior art, including, Mori et al. and Schuster et al., neither alone or in combination, explicitly teaches an exposure method/apparatus requiring “a polarization state control mechanism which changes a polarization state of the light beam which has passed through the optical guide into a linearly-polarized state, and then into a predetermined polarized state,” in the combination required by the claims.

**Claims 6, 7, 17, 18 and 31-51** are allowable by virtue of their dependency on claims 5 and 16.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 2882

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
